South Tyneside at a glance

- The health of people in South Tyneside is mixed compared to the England average. Deprivation is higher than average and 8,505 children live in poverty. Life expectancy for both men and women is lower than the England average.
- Life expectancy is 9.9 years lower for men and 7.9 years lower for women in the most deprived areas of South Tyneside than in the least deprived areas (based on the Slope Index of Inequality published on 5th January 2011).
- Over the last 10 years, all cause mortality rates have fallen. Early death rates from cancer and from heart disease and stroke have fallen but remain worse than the England average.
- About 22.3% of Year 6 children are classified as obese. A higher percentage than average of pupils spend at least three hours each week on school sport. Levels of teenage pregnancy and tooth decay in children are worse than the England average.
- Estimated levels of adult 'healthy eating' and obesity are worse than the England average. Rates of smoking related deaths and hospital stays for alcohol related harm are higher than average.
- Priorities in South Tyneside include smoking, alcohol and early identification of cancer. For more information see www.sotw.nhs.uk

Deprivation: a national view

This map shows differences in deprivation levels in this area based on national quintiles (of the Index of Multiple Deprivation 2007 by Lower Super Output Area). The darkest coloured areas are some of the most deprived areas in England.

This chart shows the percentage of the population in England, this region, and this area who live in each of these quintiles.

Health inequalities: a local view

This map shows differences in deprivation levels in this area based on local quintiles (of the Index of Multiple Deprivation 2007 by Lower Super Output Area). The darkest coloured areas are the most deprived in this area.

This chart shows the life expectancy at birth for males and females (2005-2009) for each of the quintiles in this area.

Health inequalities: changes over time

These graphs show how changes in death rates for this area compare with changes for the whole of England. Data points on the graph are mid-points of 3-year averages of yearly rates. For example the dot labelled 2003 represents the 3-year period 2002 to 2004.

Trend 1 compares rates of death, at all ages and from all causes, in this area with those for England.

Trend 2 compares rates of early death from heart disease and stroke (in people under 75) in this area with those for England.

Trend 3 compares rates of early death from cancer (in people under 75) in this area with those for England.

Trend 2: Early death rates from heart disease and stroke

Trend 1: All age, all cause mortality

Trend 3: Early death rates from cancer

Health inequalities: ethnicity

This chart shows the percentage of pupils by ethnic group in this area who achieved five GCSEs in 2009/10 (A* to C grades including English and Maths). Comparing results may help find possible inequalities between ethnic groups.

Legend:
■ England
■ South Tyneside

Ethnic Groups	% pupils achieved grades	No. of pupils achieved grades
White	54.2	923
Mixed	63.6	7
Asian	50.0	18
Black		
Chinese/other		

If there are any empty cells in the table this is because data has not been presented where the calculation involved pupil numbers of 0, 1 or 2. Some further groups may not have data presented in order to prevent counts of small numbers being calculated from values for other ethnic groups or areas.

Health summary for South Tyneside

The chart below shows how the health of people in this area compares with the rest of England. This area's result for each indicator is shown as a circle. The average rate for England is shown by the black line, which is always at the centre of the chart. The range of results for all local areas in England is shown as a grey bar. A red circle means that this area is significantly worse than England for that indicator; however, a green circle may still indicate an important public health problem.

- Significantly worse than England average
- Not significantly different from England average
- Significantly better than England average

+ In the South East Region this represents the Strategic Health Authority average

Domain	Indicator	Local No. Per Year	Local Value	Eng Avg	Eng Worst	England Range	Eng Best
